

IT GlobalSecure, Inc.

FEATURED PRODUCTS

IT GlobalSecure, Inc. has partnerships with over 50 vendors spanning the entire range of security needs. We have multiple vendors in each product area so that we can find the solution that is right for you.

Our products will secure your telecommunications, computers, mobile devices, networks, and applications. With IT GlobalSecure, you can secure your business with confidence. With our security products and services, you can protect your business assets, open up new ways of doing business, and reach new customers and suppliers. To take advantage of our product discounts, and special web promotions, call 1-866-IT-ARMOR (U.S. Toll Free) or 1-202-332-5878 for assistance in product selection, pricing, and ordering.

ActivCard

ActivCard delivers digital identity technology essential for next generation e-business communication and transactions. ActivCard's hardware and software technology and products combine the ease-of-use of an ATM transaction with a security level better than a face-to-face meeting.

Amazon

Amazon is an outstanding source of security books and manuals for the technology and business manager.

ArmadilloNet

ArmadilloNet Web Hosting provides superior customer service at an affordable price. They offer scalable website, application, e-commerce and database hosting solutions with shared and dedicated hosting alternatives.

Authentica

Authentica provides digital rights management software for protecting valuable business information shared internally or across company boundaries. Authentica can ensure that confidential information and intellectual property won't be forwarded to others. Available in the PageRecall, NetRecall, and MailRecall product families.

Baltimore

Baltimore's e-security tools verify the identity of your business partners and clients by managing which resources and information can be accessed. Baltimore's products include UNICert, CA Operator, RA Operator, MailSecure, and other components for VPN and PKI solutions.

Bardon Data Systems

Bardon's products, Full Control and WinU, provide an integrated solution for logging, auditing, and ensuring restricted access controls on desktop systems. Over 300,000 licenses have been sold worldwide.

BindView

BindView products secure today's widely used platforms and applications, such as Microsoft Windows and Exchange solutions, Novell NDS and eDirectory, UNIX, SAP, and OS/400 systems. Product lines by-Control and by-Admin let users assess, audit and administer their corporate IT policies.

Blue Ridge

Blue Ridge Networks provides outsourced VPN solutions enabling highly secure private communication over the Internet. Featuring a Public Key based authentication and encryption security system, Blue Ridge has provided secure and reliable private networking solutions to commercial enterprises and select US Federal agencies for over 10 years.

Cisco Systems, Inc.

Cisco Systems, Inc. is the worldwide leader in networking for the Internet. Cisco's Internet Protocol-based (IP) networking solutions are the foundation of the Internet and most corporate, education, and government networks.

Computer Associates

Computer Associates is the industry's #1 supplier of Internet security. Its eTrust Defense, Access, and Management eBusiness Security solutions provide the most critical element to any eBusiness initiative – an end-to-end security infrastructure.

CyberSoft

CyberSoft anti-virus and network security software identifies virus attacks, unauthorized network intrusions and file access, and other breaches across major network platforms including UNIX, NT and Windows. The VFind® Security ToolKit is continuously upgraded to satisfy the changing needs of the security market.

Dantz Development Corporation

Dantz Development Corporation is a leading global provider of backup software. Since 1984, the Dantz Retrospect family of backup products has earned numerous awards. Its customers range in size, and include British Telecom, Daimler Chrysler, Motorola, Nortel, Pixar and Walt Disney.

Dell Computer Corporation

Dell Computer Corporation, a leader in the computer industry, provides high-quality platforms for today's secure enterprise.

eEye Digital Security

eEye released its flagship product – Refina, the Network Security Scanner - in 2000 and has steadily grown its market share in the scanner market. Consider Iris, the Network Traffic Analyzer and SecureIS, Application Firewall.

Ensure Technologies

Ensure Technologies is an innovative developer of intelligent security solutions designed to provide maximum security with minimal impact on users. Ensure's award-winning XyLoc family of products provides the robust security a network needs, as well as the personalization and convenience users appreciate.

Eracom

For 20 years Eracom has manufactured cryptographic hardware and software products for uncompromising security solutions. Eracom's core products, Protectfile and Protect-server, support a broad range of Blue Chip customers around the world. Call for prices on the JProv, KMV Kits, and PC Vault product lines.

FatPipe Networks

FatPipe Networks develops leading-edge technology that provides highly redundant, reliable, and high-speed Internet access for mission critical applications. Consider FP Xtreme and FP Warp products for your high-availability network.

Fortress Technologies

Fortress is a leading developer of network security solutions featuring innovative wireless security technologies that eliminate vulnerabilities found in wireless communications. Consider NetFortress, Classic and M-Series VPN solutions for your network.

IBM

IBM is a leader in the creation, development and manufacture of the industry's most advanced information technologies, including computer systems, software, networking systems, storage devices and microelectronics.

ImageStream Internet Solutions

ImageStream is the world's leading manufacturer of Linux-based routers. The Industrial Series represents ImageStream's most economical line of routers and network cards, and the Pro Series is ImageStream's premium line.

Intrusion Inc.

Intrusion Inc. provides Network Intrusion Detection Solutions, VPN/Firewall Solutions, Vulnerability Assessment Software, and Centralized Analysis Software. Consider SecureNet, Kane Secure Enterprise Analyzers, SecureCom, and PDS Desktop appliances for VPN and intrusion prevention needs.

Kaspersky Lab

Kaspersky is one of the world's leaders in anti-virus (AV) technologies. They were the first to integrate a processor emulator for code decryption, an external AV database with embedded specialized modules, a search capability within archived and compressed files, an "on-the-fly" virus interceptor for OS/2, and integrated AV protection for Linux and MS Office 2000, and Novell NetWare featuring NDS integration.

Kerio Technologies Inc.

Kerio Technologies Inc. is a major provider of Internet security software for small to medium sized networks. Kerio WinRoute Lite and Pro, Personal Firewall, and MailServer protects local networks and offers a secure environment for corporate messaging and communication.

Mandyion Research Labs

Mandyion Research Labs is an innovator in access control. In 1998, Mandyion Labs created a simple and common sense concept toward password management with the invention of the first personal password manager.

Maxtor Corporation

Maxtor® Corporation is the world's largest manufacturer of hard disk drives in unit shipments. The company supplies innovative, leading-edge storage solutions.

MaXware

MaXware delivers products that reside on the different data repositories from Microsoft, Oracle, Novell, Lotus, iPlanet and others, to provide a carrier class, high performance Meta-Directory. Consider their Data Synchronization Engine and Virtual Directory for your directory needs.

McAfee.com

McAfee.com delivers Web-based services, including VirusScan, Oil Change, First Aid, and Uninstaller products. Consumers worldwide use these services to scan their PCs for viruses, and clean and optimize their hard drives. Other services include McAfee.com VirusScan Online, McAfee.com Personal Firewall, and McAfee.com Privacy Service.

NetIQ

NetIQ is the leading provider of solutions for systems management, security and web analytics. Only NetIQ covers the full management life cycle of your e-business infrastructure. Its award-winning products reduce operations costs while dramatically increasing the security, performance and availability of your Windows NT and Windows 2000-based applications, directories, servers and networks.

NetScreen Technologies

NetScreen Technologies is a leading maker of purpose-built, integrated security solutions that offer the scalability, flexibility and resiliency required by enterprises and service providers. NetScreen's products integrate components including firewall, VPN and denial of service attack protection, in easy to manage, ASIC-based systems and appliances.

Netstuff

Netstuff, as your specialized, pan-European operating distributor for computer and network equipment, offers a comprehensive product portfolio of market-leading manufacturers.

NewTech Infosystems (NTI)

NewTech Infosystems (NTI), a major software developer for CD-R/RW and future DVD-RW devices, has been delivering complete software solutions for CD-RW recording and backup since inception in 1993.

Nexland, Inc.

Nexland designs, develops and markets secure, affordable, easy-to-use Internet security appliances for corporate branch offices and their telecommuters. Nexland's products support the use of VPN switches at companies' remote locations and are compatible with DSL, cable, wireless, ISDN and analog Internet connections.

Panda Software

Panda Software is a leading developer of antivirus software. Panda has a 24x7 Insurance Policy that has revolutionized the computer security industry. Panda Software's products have been endorsed by major industry watchdogs including ICSA Labs and Checkmark.

Rainbow Technologies

Rainbow's products include: secure Web server and VPN acceleration boards; anti-piracy and Internet software licensing and distribution solutions; PKI-based security solutions; voice, data and satellite security systems; and USB-based authentication tokens. Use Cryptoswift, HSM200, iKey, and Netswift to secure your network.

RedCreek

RedCreek provides comprehensive, feature-rich integrated hardware and software Virtual Private Network (VPN) packages that ensure the privacy of information as it is transmitted across private and public networks. RedCreek has been acquired by SonicWALL, Inc.

Riptech

Riptech offers scalable, 24x7 Real-Time Managed Security Services based on CaltarianSM, their unique technology platform, and a full suite of expert security professional services.

Sawmill

Sawmill is a powerful, hierarchical log analysis tool that runs on every major platform. Particularly suited to web server logs, it can process almost any log. The reports that Sawmill generates are hierarchical, attractive, and heavily cross-linked for easy navigation.

SecureLogix Corporation

SecureLogix Corporation is a secure convergence company providing intelligent communications products, professional services, consulting, and certified product training.

SoftClan Computer Security

SoftClan Computer Security has developed a specialized line of Security and Auditing solutions. Consider e-cryptor as a PGP alternative for secure mail.

Solid Oak Cybersitter.

Solid Oak Software Inc. is the developer of the award winning CYBERSitter content filtering product for homes, schools, and businesses.

SonicWALL

By integrating its line of high-performance, solid-state firewalls with security services such as network anti-virus, virtual private networking (VPN), strong authentication using digital certificates, content filtering and other security services, SonicWALL Internet security appliances deliver comprehensive security solutions.

Sophos Anti-Virus

Sophos, a leader in anti-virus protection, is focused on the corporate marketplace where its vision, commitment to research and development, multi-platform support and attention to quality have made it a Fortune 500 leader.

SpartaCom

SpartaCom's family of products includes solutions for network connectivity, network resource sharing, and remote PC communications including email, fax, text-based pagers and cellular telephones. Consider WinBeep, Cryptogram, ModemShare, Modem Pooling, and NodeRunner products for your network.

SPYRUS

SPYRUS, the High Assurance PKI Systems Company for Global BusinessSM, builds and deploys Public Key Infrastructure (PKI) system solutions for demanding policy management, audit, risk, and liability applications. SPYRUS also offers the Rosetta[®] line of certified smart cards, readers and USB tokens for secure storage of digital certificates and security policies.

StarBand

StarBand is America's first consumer two-way, 24x7, high-speed satellite Internet service.

StratusBurg

StratusBurg develops award winning, high quality software solutions. ExeLock compresses, encrypts, and protects code for applications, while NetVizor provides a true employee PC management solution by monitoring, reporting and logging PC and Internet activities.

SurfControl

SurfControl is an Industry Leader for Web and Email Filtering. Let SuperScout products keep inappropriate traffic off your network.

Sygate

Sygate provides enterprise-class software that protects network assets by securing Internet devices, mobile computers and desktops from intrusion and misuse. Security Agent, Secure Enterprise, Home Network, and Management Server can secure a range of businesses.

Symantec

Protect your network and desktops with Symantec Enterprise Manager, Norton Anti-virus, Intruder Alert, NetRecon, Ghost, and pcAnywhere.

Thales

Thales is a global specialist in security solutions for electronic payments and high value transactions by business and government. Combining in-depth hardware and software skills, Thales e-Security has a strong track record in security in the card payments industry, smart card value loading and ATM/EFTPOS applications.

Tiny Software

TINY Software Inc. introduced to the market first low cost, easy to set up ICSA certified firewall for Windows operating system and was among the first companies to introduce a personal firewall for the desktop protection. Tiny Software's flagship product WinRoute Pro is now being sold by Kerio.

Tovaris

Tovaris Email Security SolutionSM is the email security platform leader. Tovaris' PKI-enabled solution suite and Mithril Secure Server are easy to implement and maintain.

Tripwire

Tripwire software establishes a baseline of data in its desired state, detecting and reporting any changes to the baseline. Consider Tripwire for Servers, Tripwire Server, Tripwire Monitor, Tripwire Manager, Tripwire for Web Pages, Tripwire for Routers, and TFRS for your data integrity needs.

VASCO

VASCO secures enterprises from the mainframe to the Internet with solutions that secure e-business and e-commerce, protect sensitive information, and safeguard the identity of users. VACMAN server products and Digipass tokens are an ideal way to secure access to your systems.

VERITAS

VERITAS Software Corporation (Nasdaq: VRTS) is the leading provider of storage management software for data protection, application availability, and disaster recovery.

Visualsoft Technologies

Visualsoft was formed to provide services for the telecommunication industry. Lock down your computers with VisualSoft Crypt, SecureDev, SecureDesktop, and FileSecure packages.

WatchGuard

Gain Superior Firewall Protection with the appliance based Firebox[®] System. WatchGuard's VPN solutions ensure private communications. WatchGuard ServerLockSM and AppLockSM/Web use LockSolidSM to prevent unauthorized changes to critical information.

Websense Enterprise

Websense Enterprise is the most comprehensive and flexible employee Internet management application on the market, running on the broadest range of integrations.

WebTrends

WebTrends' award-winning software and e-service solutions provide insights into your web visitors' behavior and preferences that translate into enhanced business performance for you. Webtrends has been acquired by NetIQ.

Whale Communications

Whale Communications secures web-based access to sensitive business applications. Whale's E-Gap Enterprise and Appliance products isolate application servers — via Air Gap technology — and tightly controls application layer access to them.

Zone Labs

Zone Labs, one of the most trusted brands in Internet security, is a leading creator of endpoint security solutions protecting millions of PCs from risks posed by hackers and data theft. Zone Labs IntegritySM is an endpoint security management platform that protects corporate data and productivity while ZoneAlarm[®] and ZoneAlarm Pro are among the most popular and successful Internet security products available today.
